

2002 HERI College Student Survey Data Services

In addition to the reports you receive as a part of your participation in the 2002 HERI College Student Survey, you may also purchase a data file of your students' responses or special reports for a nominal fee. These include:

Data File

You may order a "raw data" file containing the responses of all participating students at your institution. The data are arranged in a fixed-field format, making them accessible to analysis by statistical packages such as SPSS, SAS or BMDP; or by data base management programs such as dBase or Access.

For your convenience, a set of SPSS specifications is also included. These specifications define the data layout, provide labels for each questionnaire item and response, and compute standard recodes used in the production of your Institutional Profile. In files with as many variables as the College Student Survey (about 300), these specifications account for well over half of the effort required in conducting SPSS analyses.

The data file is available on diskette, or can be sent electronically via e-mail. *The cost is \$75.00 + \$0.10 per student record.*

Report on Spreadsheet (R.O.S.)

You may order some or all of your College Student Survey Institutional Profiles in EXCEL spreadsheet format. These spreadsheets, identical in format to the paper reports you've already received, make easy the task of creating graphs, tables, and other "user-friendly" reports. Spreadsheets are available for: 1) all respondents; 2) respondents attending college four or more years; and 3) respondents attending colleges 3 or fewer years. *Each report costs \$15.*

Additional Comparison Groups

The standard Institutional Profile you receive compares your results with those of two comparison groups determined by the stratification cell to which we have assigned your institution. You may add to your R.O.S. results from as many as four *additional* comparison groups from the twelve groups noted below. *Each additional comparison group added to a report costs \$5.*

Consortium Report

You may order a special profile based on the aggregated responses from any **five** or more participating institutions of your choice. The Consortium Report is identical in format to the standard Institutional Profile. *The Consortium Report costs \$65.00 plus \$5.00 per institution included. Contact HERI to order a Consortium Report.*

Other Special Data Services

The Higher Education Research Institute offers a number of additional data reports and services, including reports based on subgroups derived from any item or combination of items in the College Student Survey. Prices depend on the type of service provided. *Contact HERI for further details.*

Please use the form on the reverse side to order a Data File, Report on Spreadsheet, or Special Comparison Report. For more details about these services, or to order other special services, contact the HERI office at (310) 825-1925, or by E-mail at HERI@UCLA.EDU.

Comparison Groups

Use the following codes to indicate which additional groups you want to include in your Report on Spreadsheet. Enter the codes in the space provided on the order form.

01 All institutions
02 All 4+ year institutions
03 All 2 year colleges
04 Public universities

05 Private universities
06 Public 4 year colleges
07 All private 4 year colleges
08 Nonsectarian 4 year colleges

09 Catholic 4 year colleges
10 Protestant 4 year colleges
11 Public 2 year colleges
12 Private 2 year colleges

HERI cannot distribute data files unless the Certification of Research Use is completely filled out
Certification of Research Use

HERI provides data files to assist institutional research activities. By ordering this data file, you agree that these data will be used only for statistical analysis and reporting of aggregated information, and not for the investigation of specific individuals. In signing this agreement, you give assurance that use of these data will conform to widely accepted standards of practice and legal restrictions that are intended to protect the confidentiality of research subjects.
